

COMPANY OVERVIEW

Deinrim Solutions LLC is a Georgia-based information technology and consulting firm specializing in SAP and enterprise resource planning (ERP), artificial intelligence, and data modernization. The company delivers implementation, integration, custom software, and managed support that help organizations automate processes, strengthen security, and turn enterprise data into actionable insight. Deinrim combines senior SAP and artificial intelligence expertise with agile, cost-conscious delivery for organizations modernizing mission-critical enterprise systems.

CORE COMPETENCIES

- **SAP and Enterprise Resource Planning (ERP) Consulting.** SAP implementation, customization, integration, and managed support, including cloud-hosted enterprise resource planning and real-time business process automation.
- **Artificial Intelligence and Machine Learning.** Workflow automation, predictive analytics, and intelligent decision support, including artificial-intelligence-powered video analytics for real-time monitoring and security insights.
- **Cloud, Data, and Infrastructure Modernization.** Cloud migration and architecture, data modernization, advanced data analytics, and hosted infrastructure delivering high availability and business continuity.
- **Managed Information Technology Services and Cybersecurity.** Service desk, centralized monitoring, incident management, and security controls including multi-factor authentication, endpoint protection, and compliance for mission-critical systems.
- **Custom Software and Internet of Things (IoT) Development.** Secure, scalable web and mobile application development, Internet of Things solutions, and tracking technologies.
- **Business and Technology Consulting.** Business technology advisory and business process consulting that align technology investments with organizational and mission goals.

DIFFERENTIATORS

- **Delivery discipline.** Delivered an enterprise IT infrastructure modernization 8% under budget and 15 days ahead of schedule while meeting all performance and security requirements.
- **Cybersecurity results.** Raised security compliance from 70% to 98% within six months for a client organization.
- **Reliability engineering.** Reduced unplanned network downtime by 80% for a multi-location organization via proactive monitoring and preventive maintenance.
- **Senior leadership bench.** Founder with 20+ years of managed IT services experience serving large enterprise clients.
